EADE has trained professionals in Malaga some of whom today work at the forefront of companies and institutions, some of particular renown and importance.

EADE is a university centre affiliated to the University of Wales Trinity Saint David, officially recognised by the Andalusian Regional Government and listed in the Registry of Universities, Centres and Degrees Registry (RUCT) of the Spanish Ministry of Education under centre code number 29016203.

EADE also houses the Higher Education Centre for Design Studies and the Centre for Professional Training, offering official qualifications of the Andalusian Regional Government, and the Centre for Postgraduate Studies, which offers its own and official British degrees.

In 2018 it applied for recognition as the Private University of the Costa del Sol.
Malaga is at the forefront of the economic, social and demographic drive of Andalusia. The leadership of the capital of the Costa del Sol is evident in numerous studies.

Malaga has traditionally been the preferred destination for millions of tourists, as it offers an unbeatable combination of sun, beach, sports facilities, hotels, restaurants and nightlife.

Today the province of Malaga accounts for a third of all the companies set up in Andalusia.

In the field of innovation, the MÁLAGA TECHPARK (PTA) in Malaga has become a significant hub. Celebrating its 25th anniversary in 2017 with 635 companies and nearly 18,000 employees, the PTA has just announced the arrival of new companies, which will bring the number of employees to over 30,000.

Large companies such as GOOGLE, Vodafone, TDK, Telefónica, Virustotal, Siemens, Indra, Fujitsu, Huawei, Oracle, etc. have led MÁLAGA VALLEY to being referred today as the new SILICON VALLEY of Europe.
The rise of Malaga as a city of museums has attracted prestigious franchises such as the Pompidou Centre, the Russian Museum - Saint Petersburg Collection, the Carmen Thyssen Museum, the Malaga Museum, the Contemporary Art Centre and the Picasso Foundation - Birthplace Museum. According to some indicators, these museums and collections have placed Malaga as the third artistic hub of Spain with a first-rate art scene.

Malaga has also positioned itself as a leading destination for language tourism in Spain, with 23 centres, 16 of which are in the capital, accounting for almost half of Andalusia and 15 percent of Spain as a whole.

More and more university students from all over the world choose the Costa del Sol for their university studies.
Malaga is the capital of the Costa del Sol. Millions of tourists visit this city every year, attracted by its wonderful climate, its beaches and its lively nightlife.

According to a number of tourist studies, the Costa del Sol continues to be the gateway for tourists and foreign currency to Andalusia. Year after year it has consolidated its leadership in Andalusia, Spain and Europe.

However, in recent years, the cultural appeal of Malaga city has been added to coastal tourism. This continues to grow, raising the interest of the international press, such as the Daily Mail, The New York Times and Le Monde, surprised by how every year the capital breaks its records in terms of visitors and revenue.
MISSION AND VALUES

Since its beginnings, EADE has been committed to two pillars: orientation towards the working world and academic excellence. At the same time, it has sought to ensure that its students embody team spirit, and that this is reflected in a sense of solidarity in their future careers.

Its values aim to provide:

**Quality teaching**, based on teaching excellence, professional practice, knowledge and applied research in order to bring about change.

**Inclusive and secular education**, removing barriers for the participation of citizens from all backgrounds and circumstances and fostering the potential of each individual.

**Employability**, offering training and research programmes which develop entrepreneurial and creative skills and are adapted to the needs of industry, as well as internships in all fields.

**Strategic alliances**, working with others to provide training and business opportunities and ensure that Andalusia is connected to a global world.

**Sustainability**, acting to ensure that the needs of the present are met without compromising the ability of future generations to meet their own needs, and systematically integrating this principle into the style of our teaching and learning.

**Global citizenship**, through the development of multinational activities and opportunities for our students, employees and partners.

This education project has identified four strategic priorities around which all of its actions revolve:

- **Strategic Priority 1**: Students come first.
- **Strategic Priority 2**: Teaching and research excellence.
- **Strategic Priority 3**: Practical training.
- **Strategic Priority 4**: International training.

**STRATEGIC PRIORITIES**

**Employability**, offering training and research programmes which develop entrepreneurial and creative skills and are adapted to the needs of industry, as well as internships in all fields.

**Strategic alliances**, working with others to provide training and business opportunities and ensure that Andalusia is connected to a global world.

**Sustainability**, acting to ensure that the needs of the present are met without compromising the ability of future generations to meet their own needs, and systematically integrating this principle into the style of our teaching and learning.

**Global citizenship**, through the development of multinational activities and opportunities for our students, employees and partners.
